Access

1. HTTP Basic Authentication

Methods

[Jump to **Models**]

Table of Contents

POST /admin/plugins/add   Up

添加插件 (add)

向插件仓库里添加一个插件

Consumes

This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

Plugin Plugin (required)
Body Parameter —

Return type

[Result]

Example data

Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses

200

OK [Result]

POST /admin/categories/add

添加插件类别 **(add1)**

添加一个插件类别

Consumes

This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

Category [Category] (required)
Body Parameter —

Return type

[Result]

Example data

Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses

200

OK [Result]

DELETE /admin/categories/delete/{id}

删除插件类别 **(delete)**

按类别Id删除某个插件类别

Path parameters

id (required)
Path Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

DELETE /admin/plugins/delete/{id}

删除插件 **(deleteById)**

按插件Id删除某个插件

Path parameters

id (required)
Path Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

GET /user/plugins/download/{id}

下载插件 (**download**)

按插件Id下载某个插件

Path parameters

id (required)
Path Parameter — default: null

Return type
array[byte[]]

Example data
Content-Type: */*

```
""
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK

POST /user/plugins/exact

查询某个插件 (**exact**)

按插件名、版本号、操作系统和处理器架构精确查询某个插件

Consumes
This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

request_body [string](#) (required)
Body Parameter —

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
```

```
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK Result

GET /user/categories/{id}

获取插件类别 (**findCategoryById**)

按类别Id获取某个插件类别

Path parameters

id (required)
Path Parameter — default: null

Return type
Result

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK Result

GET /user/plugins/category-path/{id}

获取插件类别路径 (**findCategoryPath**)

按插件Id获取插件类别路径

Path parameters

id (required)
Path Parameter — default: null

Return type
Result

Example data

Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses

200

OK Result

POST /user/plugins/latest Up

查询最新插件 **(findLatestVersion)**

按插件名、兼容版本号、操作系统和处理器架构查询最新插件版本号

Consumes

This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

request_body **string** (required)
Body Parameter —

Return type

Result

Example data

Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses

200

OK Result

GET /user/plugins/{id} Up

获取插件详情 (**findPluginById**)

按插件Id或插件Id列表获取某个或多个插件详情

Path parameters

id (required)
Path Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

GET /user/plugins/list   [Up](#)

列举所有插件 (**list**)

按类别Id列举所有插件(支持分页)

Query parameters

categoryId (optional)
Query Parameter — default: null

page (optional)
Query Parameter — default: null format: int32

size (optional)
Query Parameter — default: null format: int32

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result]

GET /admin/plugins/list

列举所有插件 **(list1)**

按类别Id、是否已发布、是否已移入回收站列举所有插件(支持分页)

Query parameters

categoryId (optional)
Query Parameter — default: null

published (optional)
Query Parameter — default: null

deleted (optional)
Query Parameter — default: null

page (optional)
Query Parameter — default: null format: int32

size (optional)
Query Parameter — default: null format: int32

Return type
[Result]

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result]

GET /admin/categories/list

列举所有插件类别 **(listAll)**

按类别父Id列举其所属的所有插件

Query parameters

parentId (optional)
Query Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

POST /user/auth/login   [Up](#)

用户登录 (login)

用户登录

Consumes
This API call consumes the following media types via the Content-Type request header:

- application/json

Request body
LoginUser [LoginUser](#) (required)
Body Parameter —

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses

200
OK Result

GET /admin/auth/logout

用户退出 **(logout)**

登录用户主动登出

Request headers

Authorization (required)
Header Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK Result

PUT /admin/plugins/modify

修改插件 **(modify)**

修改某个插件

Consumes
This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

Plugin [Plugin](#) (required)
Body Parameter —

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK Result

PUT /admin/categories/modify

修改插件类别 (**modify1**)

修改某个插件类别

Consumes

This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

> **Category** **Category** (**required**)
> *Body Parameter* —

Return type
Result

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK Result

GET /gmx/v1/ping

查看插件仓库服务器端应用状态 (**ping**)

查看插件仓库服务器端应用状态

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

POST /admin/plugins/publish/{id}

发布插件 **(publish)**

按插件Id发布某个插件

Path parameters

id (required)
Path Parameter — default: null

Query parameters

published (required)
Query Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

POST /admin/plugins/remove/{id}

移除插件 (remove)

按插件Id将某个插件移入回收站

Path parameters

id (required)
Path Parameter — default: null

Query parameters

deleted (required)
Query Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

GET /user/plugins/search

模糊查询插件 (search)

按关键字查询插件(支持分页)

Query parameters

keyword (required)
Query Parameter — default: null

page (optional)
Query Parameter — default: null format: int32

size (optional)
Query Parameter — default: null format: int32

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

GET /admin/plugins/search

模糊查询插件 (search1)

按关键字、是否已发布、是否已移入回收站查询所有插件(支持分页)

Query parameters

keyword (required)
Query Parameter — default: null

published (optional)
Query Parameter — default: null

deleted (optional)
Query Parameter — default: null

page (optional)
Query Parameter — default: null format: int32

size (optional)
Query Parameter — default: null format: int32

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

POST /admin/plugins/upload/{id}

上传插件 **(upload)**

按插件Id上传某个插件压缩文件

Path parameters

id (required)
Path Parameter — default: null

Query parameters

files (required)
Query Parameter — default: null format: binary

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
  "retcode" : 0
}
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)

GET /admin/auth/verify

验证用户令牌 **(verify)**

验证用户令牌是否有效

Request headers

Authorization (required)
Header Parameter — default: null

Return type
[Result](#)

Example data
Content-Type: */*

```
{
  "retdata" : "{}",
  "retmsg" : "retmsg",
```

```
    "retcode" : 0
}
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- */*

Responses
200
OK [Result](#)
